Open Access Collection Policy at Emory

ASERL Webinar
June 6, 2016

Lisa Macklin
Director, Scholarly Communications Office

Chris Palazzolo
Head, Collection Management
Agenda

• Open Access Landscape at Emory
• Background for OA Collections Policy
  – Environmental Scan
  – Defining Principles
  – Support for individual faculty and researchers
• Open Access Collections Additions
• Analysis of OA initiative offers
• Implementation of OA policy
• Our recommendations
OA Landscape at Emory

• Various Open Access Initiatives

• Open Access Publishing Fund
  – Collections funds
  – Some experimentation
  • PeerJ
OA Collections Policy Background

• Why did we do this?

  – Multiple requests for funding support
  – Wide variety of models
    • Business models and
    • Distribution models
  – Needed criteria
  – Needed a process
    • We wanted to treat OA resources on par with purchased resources
OA Collections Policy Background

• What was our first step?
  – Environmental scan
    • UNT Collection Development Policy for Open Access and Born-Digital Resources
    • Discussion at 2015 ACRL Pre-conference on Scholarly Communication Lisa attended
OA Collections Policy Background

• What was our second (and most important) step?

  – Defining principles

    • Established a set of guidelines and principles to inform selectors and collection managers as to what content initiatives are to be supported by Emory Libraries.
OA Collections Policy Background

• Principles (1 of 2)
  
  – OA content should be within current collection development guidelines (e.g. would we purchase this?)
  
  – OA content should have a sustainable and equitable business model
  
  – OA content business model should have reasonable cost/content ratio
• Principles (2 of 2)

- Publisher providing OA content should be reputable (OASPA, like our OA Publishing Fund)

- Publisher providing OA content should have policy for preservation or make copy available to library

- Define role of existing OA Publishing Fund
OA Collections Policy Background

• Role of existing OA Publishing Fund

  – Support for individual scholars and researchers
    • OA Publishing fund includes articles and books
    • May fund APCs or subventions to for-profit publishers
    • OA monographs being considered as part of Mellon grant on the Future of the Monograph in the Digital Era
      – Second round of funding from Andrew W. Mellon Foundation has been requested
Workflows and Processes

• Need to establish workflow for adding Emory authored OA monograph collections in Repository

• Need to create workflow for managing requests for adding OA content to ILS
  – Utilize existing e-resource decision-making group
  – Decision on how to manage one-off v larger collections
  – Collaborate with Technical Services and Collections
    • Incorporate both MARC and non-MARC data sources
    • Maintenance of links through existing channels
Awareness of New Policy

• Meeting and discussion with subject librarians
  – Addition to Collection Management guide for subject librarians and others

• Presentation to Library Policy Committee
Adoption and Implementation of Criteria

• Applied criteria to assess financial support of Knowledge Unlatched (http://www.knowledgeunlatched.org/about-round-2/)
  – Sustainable model
  – Reasonable cost (provides allowance for print purchases by library)
  – Fit collection policy (well known academic publishers, primarily university presses)
  – MARC records and easy access to content
  – Robust preservation model
Recommendations

• Discuss and define OA collection principles
• Tie to existing collection policies
• Determine funding of OA initiatives
• Establish workflows and collaborate with other units/divisions
Resources

• Emory Woodruff Library Open Access and Collections at http://guides.main.library.emory.edu/ld.php?content_id=16498194

• Future of the Monograph in the Digital Era at http://dx.doi.org/10.3998/3336451.0018.407
