Open Access Collection Policy at Emory

ALCTS Scholarly Communication Interest Group
ALA Annual Conference, New Orleans, LA
June 23, 2018

Melanie Kowalski
Copyright and Scholarly Communication Librarian, Emory University

Dr. Chris Palazzolo
Head, Collection Management, Emory University
Agenda

• Context for Collections and Open Access
• Open Access Landscape at Emory
• Background for OA Collections Policy
  – Environmental Scan
  – Defining Principles
  – Support for individual faculty and researchers
• Open Access Collections Additions
• Analysis of OA initiative offers
• Implementation of OA policy
• Our recommendations
Greater Context of Open Access Collection-Building and Support
The 2.5% initiative (Lewis, Goetsch, Evans, Roy)

Emphasis at Emory has primarily been on financially supporting content-specific initiatives, although some of this content-level support has also served to support infrastructure and services.
OA Landscape at Emory

• Various Open Access Initiatives
• Various practices for adding and curating content
• Open Access Publishing Fund
  – Collections funds
  – Some experimentation
    • PeerJ
    • Emory Open Education Initiative
    • Data Distribution Fund
OA Collections Policy Background

• Why did we do this?

  – Multiple requests for funding support
  – Wide variety of models
    • Business models and
    • Distribution models
  – Needed criteria
  – Needed a process
    • We wanted to treat OA resources on par with purchased resources
OA Collections Policy Background

• What was our first step?

  – Environmental scan
    • UNT Collection Development Policy for Open Access and Born-Digital Resources
    • Discussion at 2015 ACRL Pre-conference on Scholarly Communication Lisa Macklin attended
OA Collections Policy Background

• What was our second (and most important) step?

  – Defining principles
    • Established a set of guidelines and principles to inform selectors and
      collection managers as to what content initiatives are to be supported
      by Emory Libraries.
OA Collections Policy Background

• Principles (1 of 2)

  – OA content should be within current collection development guidelines (e.g. would we purchase this?)

  – OA content should have a sustainable and equitable business model

  – OA content business model should have reasonable cost/content ratio
OA Collections Policy Background

• Principles (2 of 2)

  – Publisher providing OA content should be reputable (OASPA, like our OA Publishing Fund)

  – Publisher providing OA content should have policy for preservation or make copy available to library

  – Define role of existing OA Publishing Fund
OA Collections Policy Background

- Role of existing OA Publishing Fund

  - Support for individual scholars and researchers
    - OA Publishing fund includes articles and books
    - May fund APCs or subventions to for-profit publishers
    - Mellon Grant - Future of the Monograph in the Digital Era
      - Recommendation for subvention funding of OA monographs
      - Second round of funding from Andrew W. Mellon Foundation has been received
    - Emory joined TOME Initiative
Workflows and Processes

• Need to establish workflow for adding Emory authored OA monograph collections in Repository

• Need to create workflow for managing requests for adding OA content to ILS (curation of content)
  – Utilize existing e-resource decision-making group
  – Decision on how to manage one-off vs larger collections
  – Collaborate with Technical Services and Collections
    • Incorporate both MARC and non-MARC data sources
    • Maintenance of links through existing channels
Awareness of New Policy

- Meeting and discussion with subject librarians
  - Addition to Collection Management guide for subject librarians and others
- Presentation to Library Policy Committee
- Reviewed process with e-resources prioritization group
Applications of Policy & Developments since 2016

- Support of Knowledge Unlatched—multiple phases
- Addition of Project Muse and Open Book Publishers (selected collections) open access monograph titles to ILS
- Digital Scriptorium
- HathiTrust additions and enhancements to catalog; Emory contributions
- Dovetailing with Digital Collections Dissemination Policy for open-access digitized content.
- Mellon Grant
- Affordable Textbook and Teaching Materials Initiative
Adoption and Implementation of Criteria (Example)

- Applied criteria to assess financial support of Knowledge Unlatched
  (http://www.knowledgeunlatched.org/about-round-2/)

- Sustainable model
- Reasonable cost (provides allowance for print purchases by library)
- Fit collection policy (well known academic publishers, primarily university presses)
- MARC records and easy access to content
- Robust preservation model
Challenges

- Common Good sustainability
- Disproportionate costs per school
- Services versus content
- Discoverability of content
Recommendations

• Discuss and define OA collection principles
• Tie to existing collection policies
• Determine funding of OA initiatives
• Establish workflows and collaborate with other units/divisions
